

8. Open a file goes to sleep for 15 seconds before terminating

```
/* Open a file goes to sleep for 15 seconds before terminating
*/
#include "apue.3e/include/apue.h"
#include <fcntl.h>
int main(void)
{
    if(open("demo.docx",O_RDWR)<0)
        //err_sys("Open error");
    if(unlink("demo.docx")<0)
        //err_sys("Unlink error");
    printf("File unlinked \n");
    sleep(15);
    printf("Done \n");
    exit(0);
}

/*
shubham@shubham:~/Documents/C Programs$ gcc 8sleep.c -o test
shubham@shubham:~/Documents/C Programs$ ./test
Done
*/
```
